
PRESS RELEASE

A Master of Languages: ETWeb™ Enterprise

The new Talent Management Suite currently supports 18 different languages

Dusseldorf, July 14, 2005 – Having just added five new languages to its arsenal, ExecuTRACK continues to amplify its ETWeb™ Enterprise product line, once again strengthening its global position. As the only provider of strategic Talent Management software, ExecuTRACK offers comprehensive multilingual versions of its software in all of the important international languages. By the end of the year 18 languages will be available including Chinese, Arabic, Italian, Spanish, Portuguese, Hungarian, Polish, French, Dutch, Czech, German, and English.

"Deciding factors in choosing ETWeb™ Enterprise were the multilingualism and the multinationality of the solution. Only through these factors can you truly ensure worldwide acceptance and effective implementation", says Ilze Ubbink, project manager for Akzo Nobel.

Dr. Andreas Hoynigg, Managing Director of ExecuTRACK Solutions, is also convinced: "In order to sustain global processes such as Performance Management or Career & Succession Planning at the corporate level, it is absolutely vital to make the application available to employees in their native languages."

Rounding out the offering, additional services such as context-sensitive online Help and multilingual E-Learning demos enable managers and employees to quickly begin using the Self Service functionality. Through all of these combined strengths, Akzo Nobel was able to begin a global rollout of its entire Performance Management processes in just a matter of months.

The ExecuTRACK Software Group has rapidly established itself as the world leader in the market for strategic Talent Management. The solution ETWeb™ Enterprise - in use since 1983 - fully supports your organization in analyzing and managing all areas of its human capital: Career & Succession Planning, Performance Management, Skills and Competency Management, Training & Development Management, Compensation Management, Organizational Charting, and Global HR Data Warehouse.
